

Cruise Summary

1. Cruise Information

- Cruise ID and Name of vessel: KR14-05, R/V Kairei
- Title of the cruise:

“Research project for earthquake and disaster prevention in the wide area around the Nankai Trough”
- Chief scientist: Yojiro YAMAMOTO [JAMSTEC]
- Representative of the Science Party: Yoshiyuki KANEDA [JAMSTEC]
- Title of proposal: Seismic observation about earthquake and tsunami in the Nankai Trough, the Southwest Islands and off Kanto
- Cruise period and Ports of call: May 01, 2014 (Yokosuka, HQ) – May 15, 2014 (Yokosuka, HQ)
- Research area: Off Shikoku and off Kii Peninsula
- Research map

2. Overview of the Observation

- Purpose:
 1. To clarify the structure around the plate boundary of deeper part of estimated Nankai Trough seismogenic zone.
 2. To obtain the structural information about the oceanic crust of the incoming Philippine Sea plate.
- Observations:

Deployment and recovery of 35 OBSs, Airgun shooting along two survey lines (SB01, SK03-2).
